OVERVIEW

Professional Summary

A creative leader and lead data scientist with a Ph.D. in Computer Science, specializing in Computer Vision, Image Processing, Machine Learning and Deep Learning solutions with a solid mathematical, data management, and analytics background. Published author with over 1000 citations and technical reviewer for over nine years. My experience brings invaluable insight into analyzing, processing, and reporting meaningful reports and decisions and visualizing data. I am a versatile researcher with a broad knowledge of programming languages, databases, and data structures. I have taught courses in computer science, programming languages, and advanced programming concepts for over ten years at the University Level.

Management / Team Lead

Over eight years of management experience and team leader who performs and delegates multiple duties while motivating staff, making sound decisions, and working with managers and staff at all levels of responsibility. Excellent communication skills with a creative mindset. I like encouraging collaborative work environments, stimulating group creativity and promoting knowledge sharing. I have extensive experience delivering technology products from conception to delivery while allocating resources and timelines successfully.

Full-Stack Software Developer & Applied AI & DevOps

Over 15+ years of experience as a full-stack software developer with vast experience in Cyber Security, DevOps, and Cloud Native Solutions. A developer who enjoys simplicity in creative design code with a creative eye for UX and UI design. I am a seasoned programmer with experience in multiple programming paradigms, data structures and algorithms. I have architected, led, and deployed various AI Cloud solutions and products from conception to delivery. I specialized in Computer Vision, Machine Learning, Deep Learning, CNN, Business Analytics, and Information Extraction. I have deployed products with the following tech stack: Python, C++, Java, Web technologies, OAuth, SQL and NoSQL databases, Azure Cloud, Kubernetes, and Containerization (i.e., Docker).

WORK EXPERIENCE

2020–2023

*DSiD, StatCan,
Canada*

Lead Data Scientist

Technical and Project Lead of several multi-million projects under the Data Science and Innovation Division / Product Delivery Section for clients such as Public Health Agency of Canada (PHAC), Health Canada (HC), Employment and Social Development Canada (ESD), and internal Statistics Canada (StatCan) divisions.

- Led multiple agile data science and engineers teams, fostering a collaborative environment that increased team efficiency and facilitated the successful development of machine learning models for predictive analytics.
- Developed and deployed ML operations and data models for predictive analytics, contributing to an increase in accuracy and operational efficiency and a reduced manual labor by 80%. Mostly in the fields of NLP, Information Extraction, and Computer Vision
- Integrated DevOps principles, establishing CI/CD pipelines that reduced deployment time by 40% and improved overall software reliability. Seamlessly pushing Docker images to container registries, fostering a scalable and efficient deployment strategy.
- Implemented robust cybersecurity measures within the data science workflow, ensuring compliance with data protection regulations and safeguarding sensitive information.
- Implemented OpenAuth for secure authentication and authorization of RestAPI and dashboards, fortifying data access and ensuring compliance with security standards.
- Orchestrated the migration of data science applications to Kubernetes, optimizing resource utilization and scalability while implementing Helm charts for streamlined deployment.
- Implemented and enforced pre-commit hooks, code review processes, automated static code analysis, enhancing code quality and collaboration within the data science team.
- Automated testing procedures within the CI/CD and git hook pipelines to guarantee the quality of Java and Python packages before deployment.
- Designed and maintained interactive visualizations and dashboards using tools such as Django, Kibana, and Power BI, providing stakeholders with real-time insights into key performance metrics.
- Implemented automated pipelines for encoding/decoding of big data files using PKCS7, streamlining data transfer processes and enhancing the security of sensitive information.
- Collaborated with cross-functional teams, providing technical leadership and mentorship to foster a culture of continuous learning and innovation.
- Conducted regular training sessions on data science best practices, DevOps methodologies, and cybersecurity awareness for team members.

- 2016–Present **Co-founder, CTO & Project Manager, Research & Development**
Tempo Analytics, Canada
Architect, team technical lead in charge of developing a server-client cloud application to deliver the speed of service time statistics for the Quick Service Industry. In charge of conceptualizing and building novel computer vision products using machine learning and deep learning neural networks for customer detection, people re-identification, and metric learning. Allocating resources, tasks and defining timelines and milestones while communicating results to our stockholders and clients. Manage a team of software engineers, Master, and Ph.D. candidates to build the right solutions for our product. Systematically generating progress reports and analytics tools to produce business intelligence for stakeholders and clients.
- 2010–2016 **Research Assistant, Computer Vision Software Developer**
University of Ottawa, Canada
Responsible for writing research papers, presenting research findings, and develop computer vision and machine learning software to test and validate the results. Research on shape analysis, object detection and tracking solutions for augmented reality, robot localization, and surveillance applications.
- 2011–2012 **Senior Web Developer**
Proximify
Design and development of a javascript engine powering UniWeb and CCV Sync. Proximify is a cloud-based software for academic institutions and grant agencies. Envisioning and building a research network tool for creating and maintaining your Canadian Common CVs.
- 2010–2011 **Web Developer**
Dalen Design
Development and maintenance of the e-commerce website: [Hot Tub Covers Canada](#). Processing electronic payments, showcasing products, accessories, descriptions, managing reviews and comments.
- 2009–2010 **Software Developer**
Hegy Geomatics international Inc
Design and development of tools for a GIS framework related to the forest industry. In charge of creating Image analysis tools of forest stands using high resolution and Landsat imagery to monitor change, identify problems and perform forecasting. Analysis and visualizations were displayed on top of the NASA WorldWind 3D mapping application.
- 2008–2010 **Research Assistant, Computer Vision Software Developer**
University of Ottawa, Canada
Responsible for writing research papers, presenting research findings, and develop computer vision software to test and validate the results. Research on image processing techniques to extract relevant features from images.
- 2006–2008 **Software Developer**
Navaera USA LLC
Creating a web crawler and multi-platform tools for automatic clustering of documents from the web based on their content and metadata (Java, C#, and Python).

2006–2008 **Network Administrator, Software Developer**
University of Havana, Cuba
IT Team leader for the main building of the University of Havana. Design, development, and validation of network administration tools for user monitoring, domain login, email access, and internet quota management. Provided network support and IT services.

EDUCATION

2010-2016 **Doctor of Philosophy in Computer Science** GPA: 10.0/10.0
University of Ottawa, Canada
Thesis: *Efficient Feature extraction for Shape Analysis, Object Detection and Tracking*
Robust feature representations to aid shape analysis, object detection and tracking.
Supervisors: Prof. Jochen Lang & Prof. Robert Laganière

2009-2010 **Master of Computer Science** GPA: 10.0/10.0
University of Ottawa, Canada
Thesis: *Towards Feature Detection based on Morphology of Objects on Images*
Extracting lines and corners from images based on the morphology of objects.
Supervisor: Prof. Amiya Nayak

2001-2006 **Bachelor of Computer Science** GPA: 4.56/5.0 (magna cum laude)
University of Havana, Cuba
Thesis: *Diskless Cluster: Parallel and Distributed Systems*
Bootable Cluster LiveCD based on Debian GNU/Linux distribution.
Supervisor: Prof. Joel de la Noval

TEACHING EXPERIENCE

2009 – 2015	Programming Paradigms. (CSI2120),	Winter 20{15 11}.
University of Ottawa	Operative Systems (CSI 3131),	Summer 2015.
	Advanced Programming Concepts in C++{11} (CSI 2372).	Fall 20{14 12 10}.
	Introduction to Computing I & II (ITI 11{20 21} - Python),	Fall 2015.
	Introduction to Computing I & II (ITI 11{20 21} - Java),	Winter 20{14 13}.
	Computing Concepts for Business (CSI1306).	Fall 2009.
2006 – 2008	Network Administration in GNU/Linux,	Fall 200{7 8}
University of Havana	Object Oriented Programming with Java and C#,	Summer 200{8 7}.
	SQL and Relational Database Model Concepts,	Fall 2005

SKILLS & EXPERTISE

Expertise	Agile Management · Computer Vision · Image Processing · Machine Learning Data Structure & Algorithms · Object-Oriented Programming · RDMS (i.e., MSQl, MySQL, Postgres, and SQLite) · Non-SQL · Networking · Cloud Deployment · Containerization · Web Development/Design · e-Commerce · GIS · MVC
Markup and Programming Languages	C++ · C · Python · Java · C# · PHP · R · Matlab · JavaScript · Prolog · Perl · Bash · HTML 5 · XML · CSS 3
Software Development Tools	OpenCV · Microsoft Azure · Kubernetes · Docker · Visual Studio · Xcode · Jupiter Labs · Docker Images · Git · SVN · make · jQuery · L ^A T _E X · Adobe Photoshop · Adobe Illustrator · Adobe Lightroom · Adobe Dreamweaver · OpenOffice · Microsoft Office Tools

HONORS & AWARDS

- 2022 Award of Excellence: Innovation. Statistics Canada
- 2020 Outstanding Contribution Award. Statistics Canada
- 2019 Best Exterior Photo, First Place, Doors Opens/Portes Ouvertes by City of Ottawa
- 2019 Grand Prize Winner, Canada in One City Photo Contest by @Ottawatourism
- 2019 Grand Prize Photography Award, Ottawa in Bloom Contest by @Ottawatourism
- 2018 Professional Diploma in Photography (Shawacademy EQF Level 5).
- 2016 NSERC Engage Grant Program with Ross Video.
- 2015 Best real-time tracking method VOT Challenge 2015, Chile
- 2015 NSERC Engage Grant Program with Thales Canada.
- 2014 NSERC Engage Grant Program with You.i labs.
- 2012 NSERC Engage Grant Program with Cohort Systems Inc.
- 2011 NSERC CRD Grant with Pulse Microsystems Ltd.
- 2010 International Admission Scholarship from University of Ottawa.
- 2010 Ontario Centres of Excellence Grant with Hegyi Geomatics International Inc.
Project: "Green Earth (GIS)".
- 2009 Excellence Scholarship from University of Ottawa.
- 2009 Ontario Centres of Excellence Grant with Hegyi Geomatics International Inc.
Project: "Green Earth (GIS)".
- 2009 MITACS Accelerate Internship Program for graduate and postdoctoral fellows.
Project: "Advanced Tools for Forest Inventory and Management".
- 2006 Magma cum laude graduate as Bachelor in Computer Science

TECHNICAL REVIEWS - JOURNALS AND CONFERENCES

- IEEE Transactions on Instrumentation & Measurement. *TIM* 20{16 | 17 | 18}.
- IEEE Transactions on Image Processing. *TIP* 2015.
- IEEE International Conference on Multimedia and Expo. *ICME* 2013.
- IEEE International Conference on Robotics and Automation. *ICRA* 2013.
- IEEE International Conference on Multimedia and Expo. *ICME* 2012.
- IEEE International Conference on Multimedia and Expo. *ICME* 2011.
- 7th IEEE International Conference on Mobile Ad-hoc and Sensor Systems. *MASS* 2010.
